

Know What to Look For

Spotted lanternfly adults are about 1 inch long and a half inch wide with wings folded.

Nymphs are $\frac{1}{4}$ to $\frac{1}{2}$ inch long and develop through four stages, all of which are wingless.

Egg masses have a gray, mud-like covering, which can become dry and cracked over time. Older egg masses may lose their covering and appear as columns of 30–50 seed-like eggs. Egg masses can be found on trees, rocks, and other hard surfaces.

- A. Adult, wings closed
- B. Adult, wings open
- C. Nymph, early stage
- D. Nymph, late stage
- E. Egg mass, fresh
- F. Egg mass, older
